Total B2B Experience: 4.5 years | FinTech Experience: 3.5 years

PROFESSIONAL EXPERIENCE

Apsona | Associate Product Manager, Bangalore, India

Jun'26 – Present

- Architected an **AI-native outbound GTM engine** using the Claude API and 8 external APIs across a 15-stage pipeline for intent detection, account scoring, verification, personalized outreach, and reply classification; designed for **2,000+ accounts/week**.
- Built a **two-layer AI support-email triage system** using Salesforce Flow and a Claude-powered decision step, filtering non-product issues before agent drafting and reducing unnecessary AI runs.
- Drove hands-on prototyping of the agent stack, evaluating orchestration approaches, building **Python scoring and CRM dedupe logic**, designing a managed Postgres state store, and aligning Product, Engineering, and GTM.
- Defined the **v2 roadmap** for AI support automation with confidence gating, product-area and urgency routing, and a keep/edit/discard feedback loop to improve response quality and documentation.

Apsona | Product Consultant, Remote

May'25 – Apr'26

- Identified a **\$12.26M upsell opportunity** by analyzing feature-level purchase behavior across **1,700+ accounts**; developed a bundled-pricing proposal and prioritized the top **100 high-fit customers**.
- Designed and developed an **AI Support Agent using Salesforce Agentforce** (Apex, LWC, Flows, Data Cloud), integrating **500+ PDFs/logs** to reduce case volume by **30%** and improve first-response time by **25%**.
- Analyzed **CRUD activity across 1,700+ accounts** to build user segments, feature-adoption insights, and churn-risk alerts; identified **3 core features driving 70% of usage** and onboarding friction.
- Engineered a **security and compliance framework for AgentExchange** covering grounding, guardrails, and prompt-injection handling, aligned with **SOC 2, GDPR, and PDPA**; reduced clearance cycle time by **40%**.

Abaj Frontendz Pvt. Ltd. | Business Analyst

Feb'21 – Jun'24

- Drove end-to-end delivery of **B2B FinTech and digital-banking products** from discovery through launch, translating business needs into features, user stories, acceptance criteria, prioritized backlogs, UAT plans, and release readiness.
- Partnered with **Engineering, UX/UI, and Architecture** on Android/Kotlin, iOS/Swift, REST APIs, and Spring Boot microservices, covering mobile flows, API contracts, business rules, integrations, and system design behind an API Gateway.
- Worked across **AWS, Kafka, Redis, and OAuth/JWT** for cloud services, event-driven workflows, caching, authentication, observability, and security; supported identity, account, payment, card, and lending service interactions.
- Supported financial integrations including **Plaid/MX/Yodlee** for aggregation, **Marqeta/Galileo** for cards, **Stripe/Adyen** for payments, **Persona** for KYC, **Alloy/Sardine/Sift** for fraud/risk, and **Unit/Treasury Prime** for BaaS.
- Mapped external banking rails and third-party providers across **UX → API contracts → business rules → integration → UAT → security/compliance → release → observability and analytics**, managing cross-functional dependencies and delivery risks.
- Defined product KPIs and analyzed **30K+ records** to prioritize improvements; built analytics workflows processing **25K+ monthly records**, reducing data latency from **7 days to 24 hours** and improving on-time delivery by **22%**.

EDUCATION

Indian Institute of Technology, Kanpur (IIT) | Master of Business Administration (MBA)

2024 – 26

- CGPA: 8.61 / 10.00 | Concentration: Product Management & Business Analytics
- Coursework: Product Management, Business Analytics, Data Science, SQL, Machine Learning, Operations Strategy
- POR: Organizing Committee Member, Udghosh 2024 (event operations, stakeholder coordination, student outreach)

Ahmedabad Institute of Technology, Gujarat | B.Tech in Mechanical Engineering

2016 – 20

- CGPA: 8.3 / 10.00
- Predictive Maintenance System**: analyzed vibration and temperature datasets using regression techniques to forecast equipment failure patterns.
- Process Optimization Study**: conducted time-motion analysis across 3 manufacturing lines to reduce cycle time by 12%.

SKILLS

Product & Business: Product Management, PRD & User Stories, Roadmapping, Backlog Prioritization, A/B Testing, User Research, Market Analysis, KPI Definition, GTM Research, Agile/Scrum, Stakeholder Management

FinTech & Architecture: Digital Banking, Payments, Lending, Cards, KYC, Fraud/Risk, BaaS, API Gateway, Spring Boot Microservices, Kafka, Redis, OAuth/JWT, AWS

Data & Systems: SQL, Power BI (DAX, Data Modeling), Tableau, Excel, Python, REST APIs, ETL Pipelines, Data Modeling, Salesforce (Apex, LWC, Flows, Data Cloud), Git

AI/ML & Tools: LLM Agents & Orchestration, Prompt Engineering, Claude API, n8n, Jira, Notion, Figma, Power Automate
